What are the Symptoms? Coronavirus Disease (COVID-19)

COVID-19 is a new respiratory illness that can easily be spread from person to person. The disease can spread from person to person through small droplets from the nose or mouth which are spread when a person with COVID-19 coughs or exhales.

These droplets land on objects and surfaces around the person. Other people can then catch the disease by touching these objects or surfaces, then touching their eyes, nose or mouth.

The main symptoms may appear between two to 14 days after exposure.

Seek medical advise if you develop a combination of these three symptoms or are exposed to a person with these symptoms.

Know the Signs! Early detection and treatment can contribute greatly to survival of the patient.

CALL 719 or DIAL *719# IF YOU HAVE SYMPTOMS
Are Your Hands Clean?

According to the American Society for Microbiology, only one in three adults wash their hands after coughing or sneezing.

Germs can thrive up to 48 hours on some surfaces so keep your hands clean at all times to prevent the spread of diseases!

WASH YOUR HANDS USING SOAP AND RUNNING WATER OFTEN FOR 20 SECONDS

DRY HANDS THOROUGHLY WITH A CLEAN TOWEL

USE HAND SANITISER AND RUB YOUR HANDS TOGETHER UNTIL DRY
